and Second Grade...

FAMILY MATH NIGHT

Lincolnville Central School

December 4, 2018

5:00-5:30 PM Free Pizza in the
Walsh Common

5:30-6:30 Family Math Night will
take place in your students room.

Please call the office ASAP if you plan to attend so that we can plan for

Dates to Remember:

12/02 Gingerbread Event 2:00-4:00 PM

12/03 LCS Busline BB v Drinkwater-Girls play 1st 3:45 PM

12/04 K-2 Family Math Night 5:00-6:30 PM

12/05 LCS Busline BB v Hope-Boys play 1st-3:45 PM

Positive Attitude Towards Math Predicts Math Achievement in Kids

A positive attitude toward math boosts the brain's memory center and predicts math performance independent of factors such as a child's IQ, a Stanford study has found.

For the first time, scientists have identified the brain pathway that links a positive attitude toward math to achievement in the subject.

In a study of elementary school students, researchers at the Stanford University School of Medicine found that having a positive attitude about math was connected to better function of the hippocampus, an important memory center in the brain, during performance of arithmetic problems.

The findings were published online Jan. 24 in Psychological Science.

Educators have long observed higher math scores in children who show more interest in math and perceive themselves as being better at it. But it has not been clear if this attitude simply reflects other capacities, such as higher intelligence.

The new study found that, even once IQ and other confounding factors were accounted for, a positive attitude toward math still predicted which students had stronger math performance.

Fun With Code

Our middle school students are taking the ball and running with it when offered coding options for Flex time activities. The 6th graders, no strangers to coding given their Khan Academy Animation coding experience, chose to jump in to the Tynker.com modules on Monday. We were so engaged we almost missed dismissal! Looking forward to more choices for coding challenges with the 7th & 8th graders during Flex as well.

SCREEN AGERS

There are so many reasons why for many youth screen time has crowded out activities and interactions that would benefit them—in other words, why they are experiencing excessive screen time.

One of the reasons is the inner discomfort that many parents (and teachers) feel from saying “no” to their children and teens. Saying no and being able to tolerate the myriad of emotions that result, such as guilt, self-doubt, and sadness is challenging for many people. On top of that, the child may add on their own negative emotions to the “no,” such as anger and disgust. Having to tolerate any one of these emotions, let alone several of them at one time, is a major undertaking.

Perhaps you have been wanting to set new limits, such as saying “no” to screen time in the car, “no” to screens in the bedroom at bedtime, “no” to screens at the dinner table. I will give some tips below but first these insights.

I have thought long and hard about how challenging it is to tolerate the discomfort of setting boundaries and saying no, not only from my viewpoint as a researcher and speaker on tech and parenting but also from my 25 years of practicing medicine. The hardest “no” that health providers are confronted with over and over is a person requesting opioids when the provider does not think the opioids are in the best interest of the patient.

What has frankly shocked me over the past couple of years with the discussions on the causes of the opioid crisis is that I never hear anyone (reporters, authors, policy makers, etc.) bring up the fact that a contributing cause to this crisis is the fact that health care providers often prescribe these medicines because they can’t tolerate the backlash from saying “no.” We hear reasons about how the drug companies told providers that the long-acting opioids were not addicting, about broken health systems, and others, but the human interactions in the providers’ offices are ignored.

In medical school, students learn next to nothing about addiction medicine. This amazed me since so many of the patients I was seeing in the hospital were there due to addictions (lung disease and tobacco, liver disease and alcohol, and so on). I decided to do an elective in addiction medicine and had the good fortune of having an incredible

mentor, Dr. Barry Rosen. He would always tell me that, “The surgeon has her tool, a scalpel...my tool is my words.” Watching Barry lead complex dialogues, laden with intense emotions from his patients such as shame, denial, and hope, was true mastery in action.

I went on to do research and short films on doctor-patient communication, opioid requests, and recovery. In the films I talk about one way to stay compassionate when setting boundaries is to remind oneself that it is the addiction talking (or crying or yelling), and not the person. That person at say 15, or pick any pre-addiction age, would never have thought to themselves “I would love to be a slave to heroin, wouldn’t that be great and how cool to know that I could die each time I use it.”

The real skill of a health provider is in their effective communication to be able to maintain a connection with the person so that along with a “no,” come discussions about why the “no,” collaborative decision making for alternatives and at times conversations about recovery treatment. Daily my heart hurts when I think of all the people and families dealing with an addiction of any type. If you are interested to hear about the many solutions happening around the opioid epidemic, my dear friend Ann Boiko just launched a wonderful podcast series on iTunes called Finding Fixes. I recommend listening to an episode with your teens. Back to our topic of saying “no” to prevent excessive screen time. Here are some tips.

Prepping to say the “no”

1. Spend time writing out why you want to set this screen limit so you feel confident that it is an overall positive thing for your child—such as providing undistracted time for better sleep or for them to build in-person relationships.
2. Remind yourself that there are hundreds of studies that show parenting with love, but with boundaries, leads to the best outcomes (vs. command and control type parenting or a passive parenting style.)
3. Baby steps are key. Just pick one thing you have wanted to say “no” to and work on that single challenge. Start with the easiest one.
4. Know that you are modeling to your children, students, girl scouts, etc. the deeply important skill of “acting with

integrity.” If you really believe, as I do, that having times undistracted by devices is good for youth (and all of us), then you are showing them that you are willing to act in line with your beliefs even though it means stepping into discomfort.

Fostering autonomy

Achieving greater autonomy as one enters adulthood is a primary human need. Whenever possible give your child some agency around the “no.” For example, you realize that you think that it is more beneficial to your 13-year old that devices, including the phone, no longer are in her room at bedtime. You do the steps above and now want to appeal to her need for some control. Ask something like, “What time are you thinking the phone should be put away? Should I come and get it or should you give to me at that time?”

Holding person accountable

One of the biggest gifts we give is holding people we care about accountable for their actions. It takes energy to do this and yet payoffs are well worth it. So know as you do the work to enforce the “no” that you are giving a gift, one of energy and dedication. In an upcoming TTT, I will talk more about accountability and consequences.

For today’s Tech Talk Tuesday here are some questions to open a conversation around “no.”

1. As always start a conversation about the positives of tech such as what cool tech activity grabs everyone’s attention the strongest these days.
2. If your child currently has any devices with them in the bedroom at bedtime, ask the reasons they like having your devices in their room with them.
3. What time do they think is a reasonable time to put devices away, out of their room?
4. Discuss other possible “no” situations related to screens that you may wish to create.

We encourage you to go to our website and read through some of the hundreds of past Tech Talk Tuesdays blog posts covering dozens of topics full information and tips. Feel free to share this newsletter with your community and encourage them to sign up for our Tech Talk Tuesday.

Warmly,

Vouchers Not Valid with any other offer or promotion. Expires 4-30-20

2019 Mid-Coast Wrestling Club

YOUTH WRESTLING PROGRAM

- Who : Any interested boys or girls grades K-4. Kids will be separated by age and weight.
- When & Where : Tuesdays and Thursdays from January 3rd 6:15 to 7:30 through Thursday February 14th at Camden Hills Regional High School Wrestling Room. Then Tuesdays and Thursdays 5:30 to 7:00 at Camden-Rockport Middle School in the gym.
- Cost : FREE!

MCWC's Youth Wrestling Program offers a fun, easy, and affordable opportunity for area youth to try the sport of wrestling. This is a good way for to be actively involved in a team sport that is focused on individual development.

Some participants may choose to attend the numerous youth tournaments around the state. Tournaments are usually on Sundays.

Wrestling shoes and headgear will be required equipment after the first two weeks of practice. We have some that wrestlers can borrow.

NO EXPERIENCE NECESSARY. Wrestling is a safe sport (less serious injuries per participant than soccer or basketball) that kids of all shapes and sizes can be successful in. Please come and give it a try!

Join our Facebook Group @ Mid-Coast Peewee Wrestling 2018

MCWC PRE-SEASON MIDDLE SCHOOL WRESTLING 2019

The Mid-Coast Wrestling Club will start practices two times a week for wrestlers in grades 5-8 at Camden Hills Regional High School starting Thursday, January 3rd at 6:15 p.m.

Experienced wrestler? Come and get a jump on the competition and train for our own Maine Youth Opener wrestling tournament which is Sunday, January 20th at Camden Hills.

New wrestler? Come and learn the basics and get a feel for the sport before the start of the Middle School (Tuesday Jan 22nd) season. HAL wrestlers are welcome to join the Camden-Rockport Middle School (CRMS) squad!

ALL BOYS AND GIRLS 5-8 IN THE FIVETOWN AREA WELCOME!

Where: Camden Hills Regional High School Wrestling Room

When: Thursday January 3rd through Thursday January 17th 6:15 to 7:30. (Regular season practices will then start at Camden-Rockport Middle School M-F 4:00 to 5:30).

Cost: FREE!!!!

Gear: Clean shorts, t-shirt, and wrestling shoes or clean sneakers.

Please contact me for more information or to try to help arrange transportation. I hope you see you on the mat!
